

# **Multiple interests as management challenge for German housing companies: How diverse and conflicting are their stakeholders' expectations?**

TECHNISCHE  
UNIVERSITÄT  
DARMSTADT

## **European Real Estate Society Conference 2015**

Istanbul, Turkey

June 26<sup>th</sup>, 2015

**Dipl. Wirtsch.-Ing. Stephanie Heitel**

**Prof. Dr. Andreas Pfür**

Technische Universität Darmstadt, Germany

Department for Real Estate and Construction Management

# Housing companies have to satisfy diverse stakeholders & fulfill an increasing number of tasks

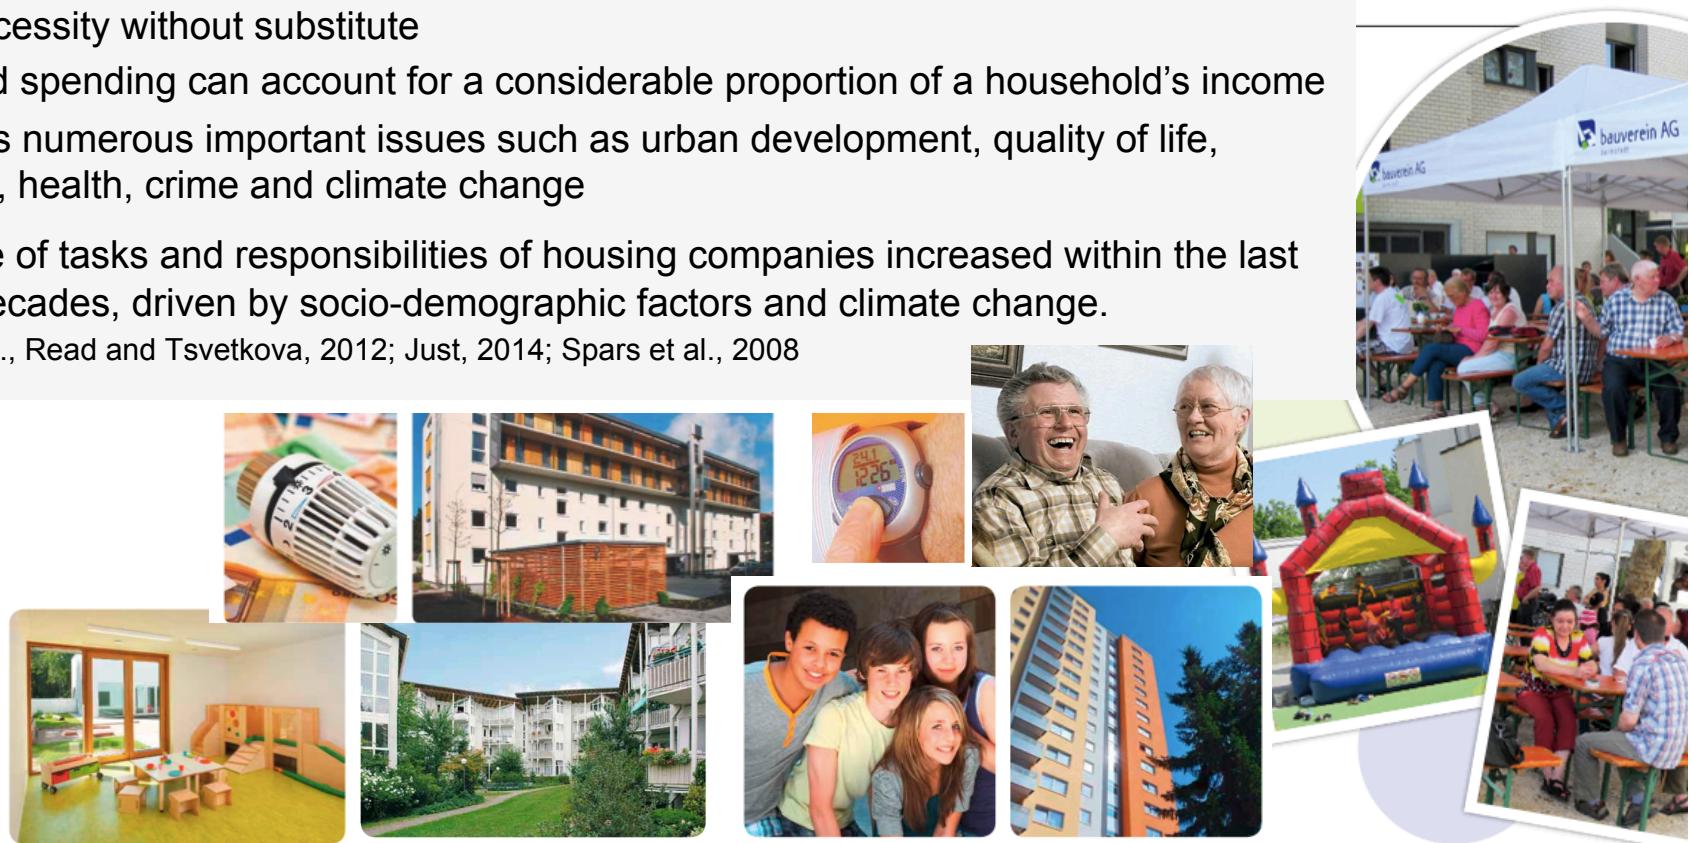

Special characteristics of housing and challenges for housing companies

## Housing ...

- ... is a necessity without substitute
- ... -related spending can account for a considerable proportion of a household's income
- ... impacts numerous important issues such as urban development, quality of life, education, health, crime and climate change

The range of tasks and responsibilities of housing companies increased within the last several decades, driven by socio-demographic factors and climate change.

# Expectations of stakeholders towards German housing companies are numerous compared to the situation in many other countries

TECHNISCHE  
UNIVERSITÄT  
DARMSTADT

Special characteristics of the housing market in Germany

**Stakeholder-oriented Corporate Governance System:** Companies are expected to consider the plurality of interests of different affected groups, including among others employee participation by law (e.g., Detomasi, 2008; Fifka, 2013).

**Important role of rental housing:** The housing market is traditionally dominated by the rental market, which provides 60% of all dwellings. The population density is high and land is a scarce resource in some cities (e.g., BMVBS and BBR, 2007).

**Integrated rental market:** Private and public companies can offer social housing, and both are in competition on the market (e.g., Kemeny, 2006).

**Strong regulation:** The housing market is highly regulated, e.g. limitations of rent increases and energy-efficiency standards for new buildings (e.g., Kühne-Büning et al., 2005).

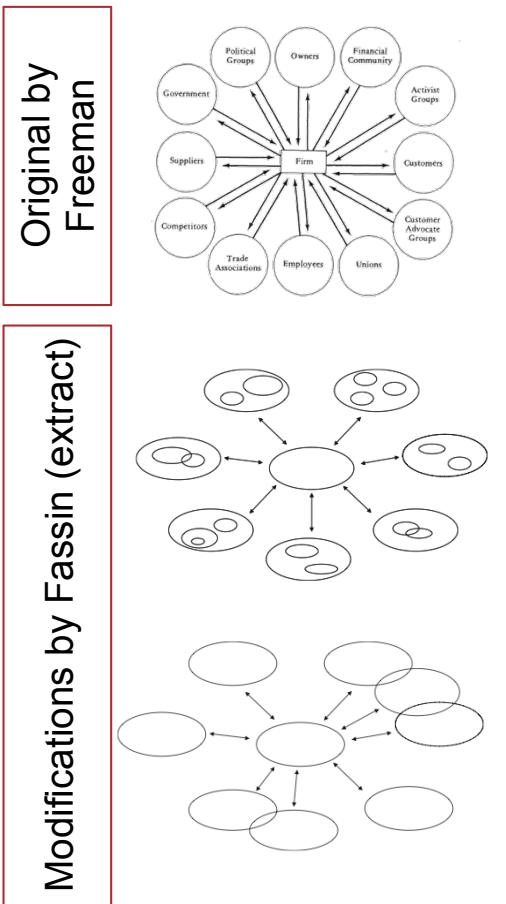

**Even more expectations towards public housing companies:** Due to their social mission, municipal housing companies need to consider an even broader spectrum of interest groups. Not meeting the financial expectations and not being able to convincingly demonstrate the value-add for the municipality, several German publicly owned housing stocks were sold in the decade between 2000 and 2008 (e.g., BMVBS and BBR, 2007; Heitel et al. (2011)).

# Organisational targets should comprise expectations from active & passive stakeholders

Relevance of stakeholders for the company and the target-setting process

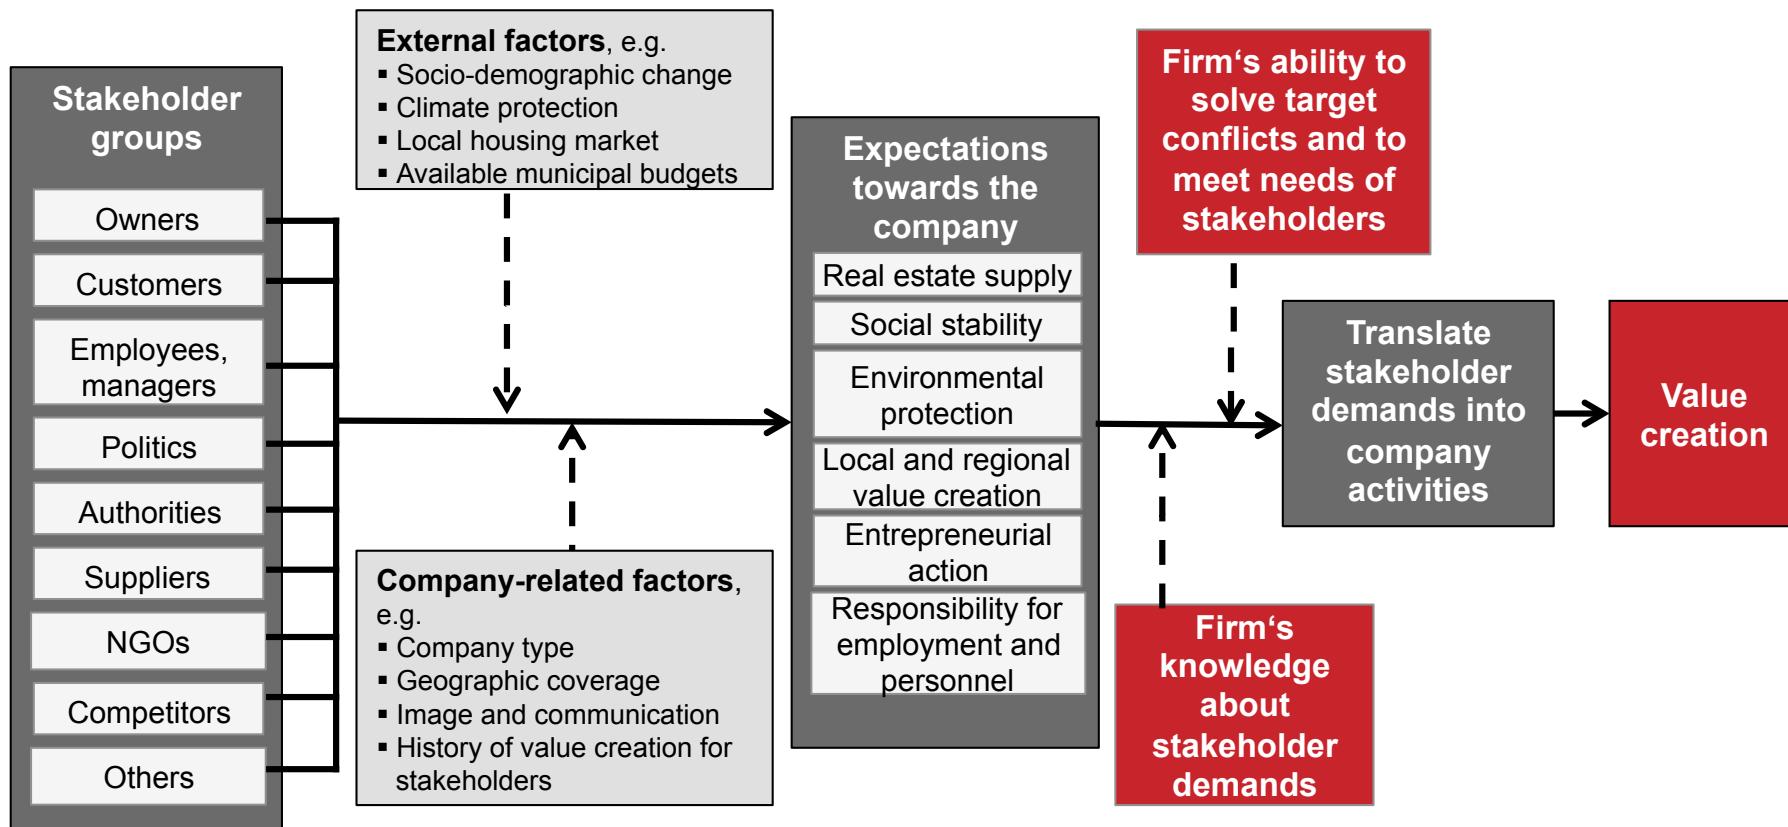

- A stakeholder is "**any group or individual who can affect or is affected by the achievement of an organization's purpose**" (Freeman (1984))
- Stakeholders expectations to be fulfilled to a certain extent for the **survival of the firm** (cf. **incentive contribution theory** by Barnard 1938)
- Existing expectations and targets can be complementary, competing or indifferent.
- Coalition model of the firm **with active & passive stakeholder groups**; organisational targets as result of a bargaining process. (cf. Cyert/March 1963)
- **Reality more complex** than simplified stakeholder model, e.g. **heterogeneity within stakeholder groups**, multiple inclusion and double appartenance, network relationships, variability in dependence and impact of stakeholders, etc. (e.g. Fassin 2008)

# Integration of the stakeholder interests is essential to create value beyond financial performance

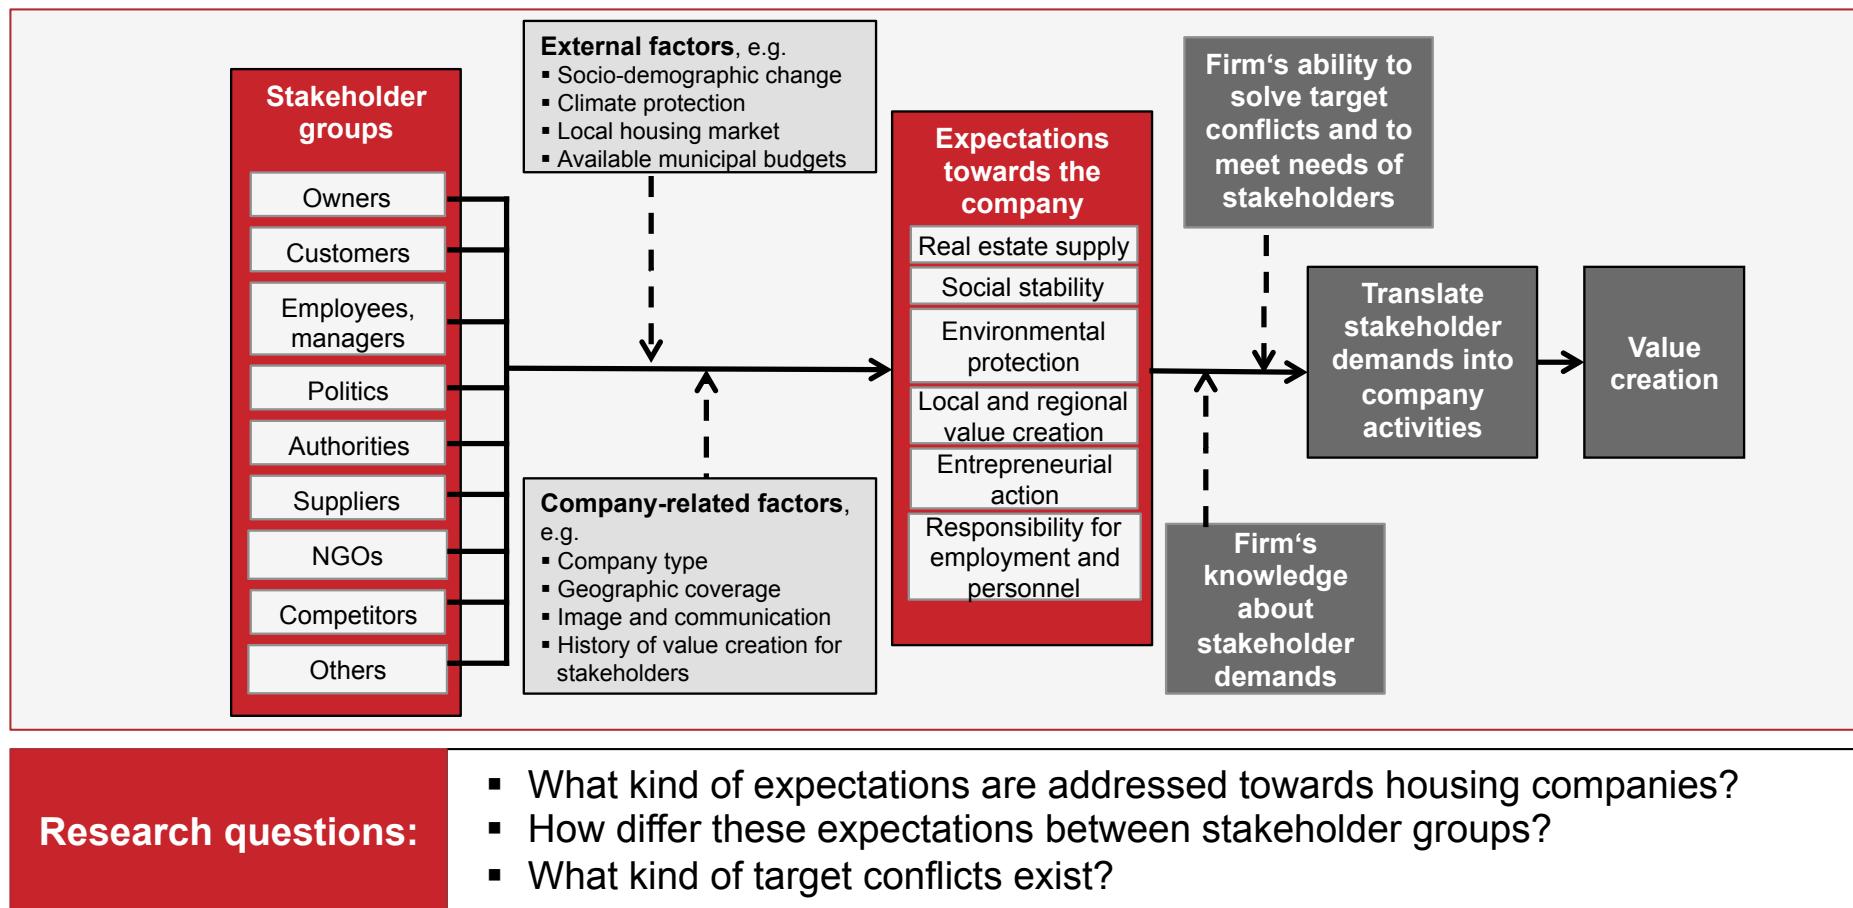

Factors for value creation by housing companies related to stakeholders  
Framework integrates ideas from Harrison et al. (2010) and Plaza-Úbeda et al. (2010)

# Research focuses on more insights in stakeholder expectations towards housing companies

## Framework and research questions

# Two surveys were conducted in a case study with one company to collect stakeholder expectations

TECHNISCHE  
UNIVERSITÄT  
DARMSTADT

Research design - Overview on collection and analysis of stakeholder expectations

| Main intention                                 | Data gathering                                     | Analysis                                   | Participants |
|--|--|--|--------------|
| First comprehensive collection of expectations | Semi-structured interviews, recorded & transcribed | Qualitative data analysis (QDA)            | 35           |
| Representativeness and quantitative evaluation | Web-survey   | QDA, descriptive and multivariate analysis | > 270        |

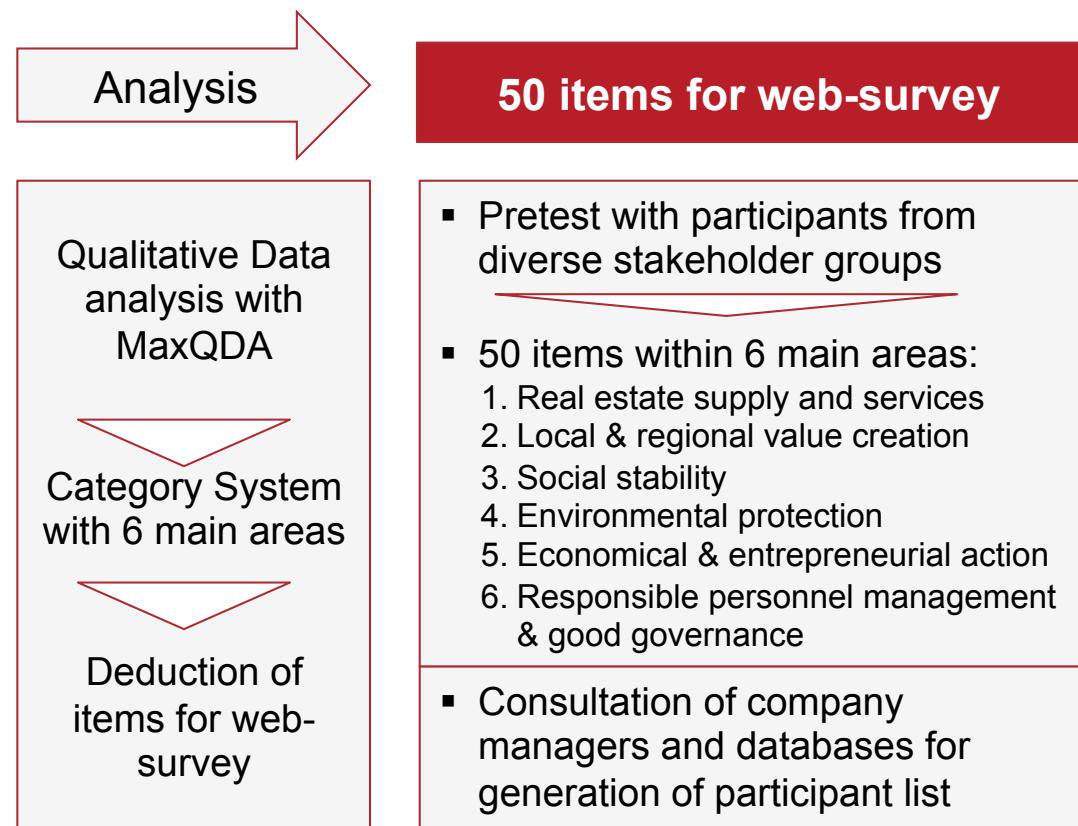

## Case study with one German municipal housing company

- member of EURHONET (European Housing Network)
- pioneer in publishing CSR report
- approx. 19 thousand dwellings

# Item list for web-survey was developed based on stakeholder interviews followed by pretesting

Pre-study for conception of online questionnaire

| 35 stakeholder interviews,<br>recorded & transcribed |   |  |
|--|---|--|
| Internal   | Owners                                    | Holding,<br>chairman of the supervisory board  |
|  | Management                                | Board of directors   |
|  | Employees                                 | Works council  |
| External<br>economic                                 | Tenants                                   | Tenant's advisory board,<br>further representatives of tenants   |
|  |   | Local tenants' association   |
|  | Subcontractors<br>& service-<br>providers | Social service provider  |
|  |   | Technical service provider,<br>architects, engineers   |
|  |   | Energy supplier, waste-disposal firm   |
| External<br>non-<br>economic                         | Banks                                     | Local savings bank   |
|  | Politics                                  | City administrators, city council  |
|  | Authorities                               | Authorities, e.g. for urban planning and<br>housing, for social affairs and<br>prevention, for youth welfare |
|  | NGOs                                      | Associations e.g. for children, elderly or<br>disabled people,<br>environmental protection                   |

# Stakeholder web-survey with individual code – answers combine scales & free entry fields

TECHNISCHE  
UNIVERSITÄT  
DARMSTADT

## Invitation letter, reminder and screenshots of web-survey

Sollten Sie teilnehmen wollen, was uns sehr freuen würde, finden Sie hier Ihren persönlichen Zugang zum Online-Fragebogen – eine Antwortabgabe ist bis zum 30. September möglich:  
[www.immobiliens-forschung.de/stakeholderbefragung](http://www.immobiliens-forschung.de/stakeholderbefragung)  
Zugangscode: Passwort 75ajyjhB

Befragt werden rund 1.000 Stakeholder, darunter Kunden, Mitarbeiter, Journalisten sowie Vertreter aus Politik, Behörden, Banken und Non-profit-Organisationen. Die Ergebnisse werden in anonymisierter Form durch Mitarbeiter der TU Darmstadt nach Stakeholdergruppen ausgewertet. Rückschlüsse auf einzelne Personen sind möglich, die Befragung unterliegt den geltenden Regeln des Datenschutzgesetzes.

Bei inhaltlichen oder technischen Rückfragen können Sie sich gerne an Frau Heitel ([heitel@bwl.tu-darmstadt.de](mailto:heitel@bwl.tu-darmstadt.de)) wissenschaftliche Mitarbeiterin am Fachgebiet Immobilienwirtschaft der TU Darmstadt, wenden.

Mit Ihrer Bewertung helfen Sie der bauverein AG dabei, ein differenzierteres Bild von den Erwartungen ihrer Stakeholder zu erhalten. Gleichzeitig leisten Sie einen wertvollen Beitrag zur wissenschaftlichen Untersuchung des Themas „Stakeholdermanagement in der Wohnungswirtschaft“. Hierfür möchten wir Ihnen an dieser Stelle danken!

Mit freundlichen Grüßen  
bauverein AG  
Darmstadt

Good communication &amp; dialogue</li></ul>     |

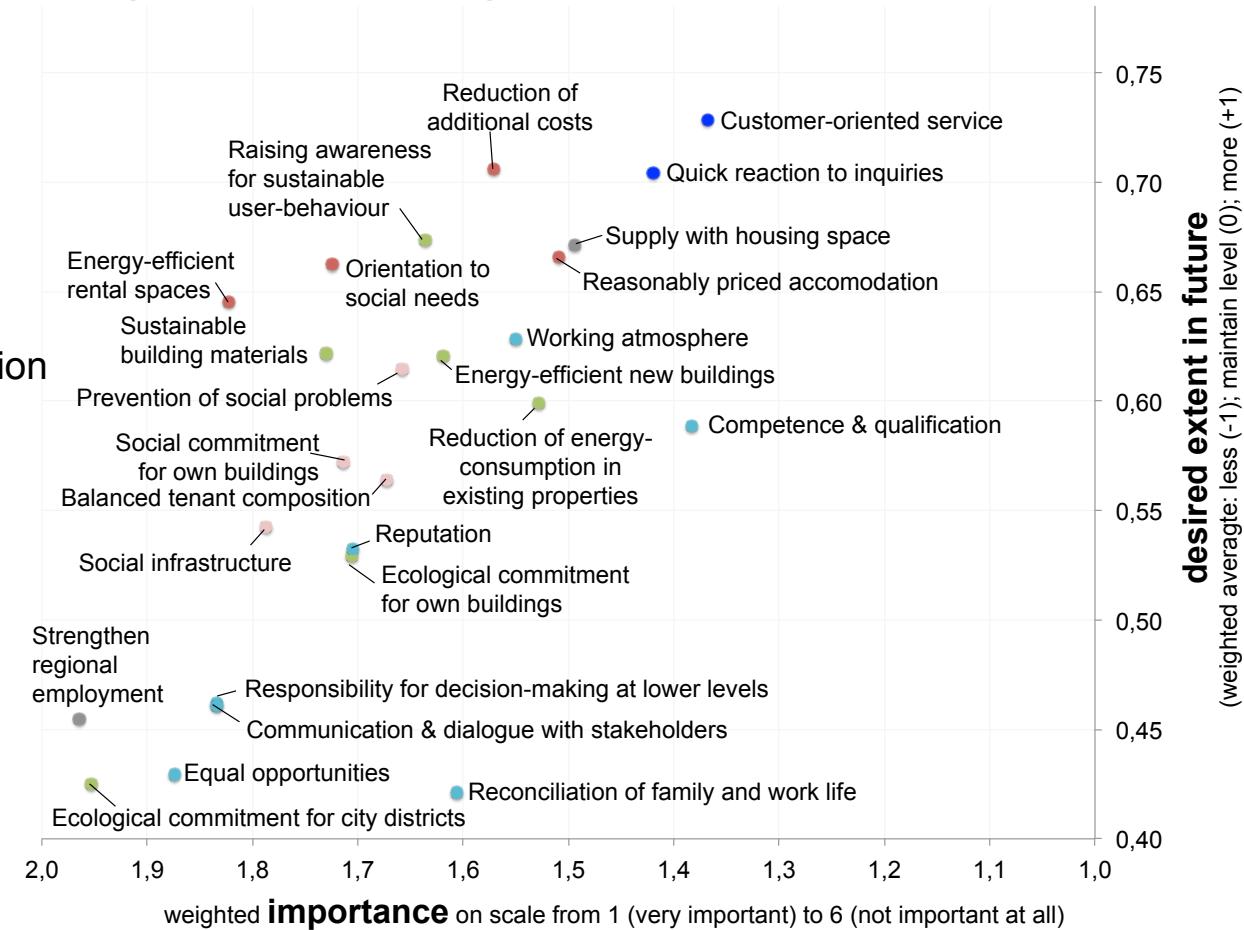

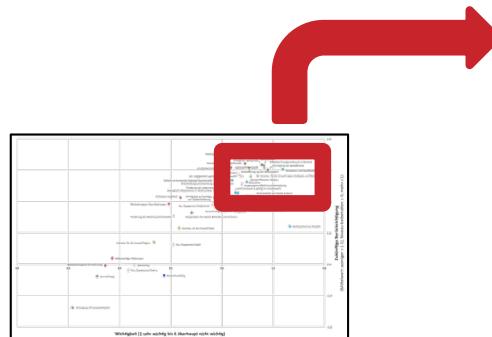

- Clear differences of stated expectations between stakeholder groups
- Results relate closely to the ideas of the incentive contribution theory

# A large number of issues was rated as being important

Items by weighted average on importance and expected future extent of activities

- Real estate supply and services
- Local & regional value creation
- Social stability
- Environmental protection
- Economical & entrepreneurial action
- Responsible personnel management & good governance

# Items were aggregated by factor analysis to 11 components

TECHNISCHE  
UNIVERSITÄT  
DARMSTADT

## Results of factor analysis - Principle Component Analysis (PCA), Varimax rotation

| Area   | Rotated component matrix                                 |             |             |             |             |             |             |             |             |             |             | Rotated sum of squared loads |              | Reliability      |              |   |

| <b>Profit generation</b>                   | (2.74/3.15)           | Initiatives for prevention of social problems (2.13/1.69) |
| Profit generation                          | (2.15/2.94)           | Quick reaction to inquiries (1.69/1.37)                   |

# Target conflicts may arise when ecological, social or economic contributions exceed a threshold

Complementary & conflicting targets visualized in Balanced Scorecard perspectives

# Definition and alignment of targets with main stakeholders enables a sustainable management

## Conclusion & outlook

### Conclusion

- Municipal housing companies in Germany are confronted with various expectations.
- Managers should be aware of the heterogeneity of these expectations.
- Instead of focusing only on stakeholders with whom they interact regularly or who engage proactively, companies should try to integrate multiple stakeholder perspectives for decision-making to fulfill the diverse needs as best as possible.
- Target-conflicts seem to exist especially between social, ecological and economical goals – as soon as a certain threshold is exceeded.
- Definition and alignment of targets with main stakeholders enables a sustainable and long-term oriented management of housing companies.

### Outlook

- Cluster analysis of stakeholders to get more insights on heterogeneity of stakeholders
- Quantitative testing of dependencies and target conflicts by using Structural equations modeling

# Multiple interests as management challenge for German housing companies: How diverse and conflicting are their stakeholders' expectations?
